Boots and ankle boots for children have a last formed for children's feet. All models have water and dirt repellent PU coated split leather reinforcements, changeable felt insole and reflective strips. Nearly all children's models have warm pile lining, some have fleece lining. The boots can be washed and dried in max 40°C.

**Black**

1960 20 Sizes: 35-47

**Dark Brown**

1960 50 Sizes: 35-47

## **kuoma-shoes are light and extremely warm Finnish boots for winter use.**

*The sturdy, durable, flexible, thermally insulating PU outsole is moulded directly on to the upper to bond better than a glued outsole. Although the sole may be slippery when new or in difficult conditions, grip improves after brief wear.*

*Elastic heel counter is bonded straight on to the outsole for heel support.*

*All models feature durable leather reinforcements impregnated against damp.*

*There are 3M-Scotchlite® reflective strips in front and back for extra safety.*

*Under surface material there is a layer of thermal insulation foam with closed cell structure to prevent water absorption (product dries quickly).*

*Double stitching is used to provide extra strength in seams subject to tough wear and tear.*

*The surface material is hardwearing and has good moisture and dirt repellent properties thanks to Nuva®-treatment.*

*Inside the boot there is a clear size label with space for name (children's models).*

*The inner lining is made of quality pile which is warm and durable.*

*Models made of textile are machine and hand washable. Washing and drying temperature 40°C max.*

*The warm, removable insole has rough under surface to prevent "rolling" under the foot.*
